

How To Locate Books In Other Libraries

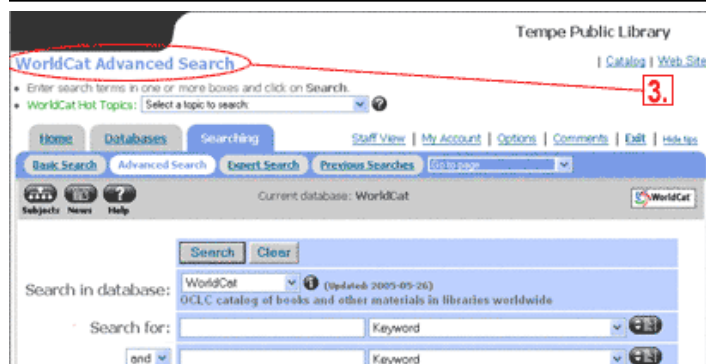

WorldCat is a database that lists the contents of libraries worldwide. If a particular book is not available at Tempe Public Library, **WorldCat** can help you pinpoint other local libraries that may have an available copy.

Here's how:

1.a. When you are at the Library: Select the "Other Databases" button in the Library Catalog (on a catalog computer). Look in the center column for the **WorldCat** heading.

1.b. When you are using a computer at home: Go to <http://www.tempe.gov/library/>. Select **electronic resources**. Look for the **WorldCat** heading.

2. You will need to input your name, library card number and PIN before you may gain access.

3. When the **WorldCat** page opens, check to be sure you are in the **WorldCat Advanced Search** page. If not, click on the button labeled **Advanced Search** underneath the **Database** tab.

4. a. Insert your cursor in the **Search for** box, and type the title of the book you are looking for.

4. b. Select the **Title** option in the second field under the down arrow.

4. c. Insert your cursor in the next search box, and type the title of the book you are looking for.

4. d. Select the **Author** option in the second field under the down arrow.

Scroll down and click on the **Search** button.
